**Building Damage** – On Monday, December 26, 2022, Officer McHenry noticed water on the Administrative side and contacted the administrative staff. The bathroom doors were left open and water dripping in the sink to prevent lines from freezing due to the cold forecast. The line above the men’s restroom busted. The line is the drip line for the floor drain traps. Staff came in Monday evening to remove items off the floors and contact Serv-Pro. Serv-Pro came out on Tuesday, December 27, 2022 to remove all the water from the floor and used fans to dry the walls. Thursday, December 29, 2022, Servo-Pro cut and removed approximately 2 feet of drywall and fans ran over the weekend to dry everything. FUTURE: Waiting on quote from drywaller, waiting on quote to have carpets cleaned, already received quote for new carpet/flooring already. Jason Rose has looked at the plumbing and has a plan to reroute the plumbing so this does not happen again.

Mayor Howard asked Jason Rose to give Council an update. Mr. Rose stated that he was unaware that the drain was in the ceiling. The leak was in the rafters and was actually a drip line for the traps of the drains in the floor and is spring activated such as a flushing of a toilet. The idea was to lower the lines to access lines in the walls. Roger storer is coming in the morning to work on the pipelines.
